INTRODUCTION

This document is intended to assist owner/operators in understanding the review, approval and operation of Temporary Food Service (TFS) Facilities that are operating from permanent building or structures and are not operating as a Mobile Food Facility (MFF). However, it does not establish regulatory requirements and the recommendations contained herein are not intended to supplant, or otherwise serve as, the rules and regulations applicable to food facilities in a given Federal, State, local or tribal jurisdiction.

TEMPORARY RETAIL FOOD FACILITIES OPERATING IN LOCAL HEALTH JURISDICTIONS SHOULD NOT FILL OUT THIS APPLICATION, BUT SHOULD CONTACT THE APPROPRIATE LOCAL HEALTH DEPARTMENT TO OBTAIN A LICENSE. A list of Local Health Departments can be found at www.EatSafePa.com

DEFINITIONS

Food Facility - Includes an operation that is conducted in a mobile, stationary, temporary, or permanent facility or location; where consumption is on or off the PREMISES; and regardless of whether there is a charge for the FOOD.

Mobile Food Facility (MFF)- A movable retail food facility, such as a stand, vehicle, cart, basket, box or similar structure, from which food is stored, prepared, processed, distributed or sold and the facility:

- (1) physically locates at one site or location for *no more than* 14 consecutive days, in one calendar year, regardless of whether or not the facility operates continuously during that time period; and
- (2) is not a retail food facility holding a temporary license.

Time/Temperature Controlled For Safety (TCS) food- A food that requires temperature control because it is capable of supporting the rapid growth of infectious or toxic microorganisms which can make people sick.

Temporary Food Service Facility (TFS)-A food facility obtaining a Temporary Retail Food Facility License, which is non-mobile.

Temporary Retail Food License

- **A license that is the following (Temporary Event License):**
 - Issued to the operator selling in conjunction with an event or celebration and
 - Valid for the duration of the particular event or celebration of no more than 14 days duration (whether these days are consecutive or nonconsecutive)
- OR
- **A license that is the following (Temporary Food Facility License):**
 - Issued to a food facility operator operating a food facility, whether stationary or mobile and in operation for a total of no more than 14 days within a particular calendar year and
 - Not in conjunction with an event or celebration

Fees: Temporary Licenses are \$14.00. Do not send money with this Application. The license fee will be collected at the time of your licensing inspection. Check or Money Orders only made out to the 'Commonwealth of PA'.

PLAN REVIEW AND APPLICATION PROCESS

No person, firm, or corporation is allowed to operate a food facility (permanent or temporary) where food or beverages are served to the public without a license from the food regulatory authority.

The plans and application for a non-mobile TFS must include all the information necessary to assure that the physical and sanitary facilities are adequate to ensure safe food, in the same manner a permanent food facility goes through plan review.

Prior to issuing a license to a food facility, the Department is responsible for performing a pre-operational plan review. The review provides the opportunity to review areas of concern and must be conducted prior to the issuance of a license. This process should begin 60 days prior to opening the TFS.

To obtain a temporary retail food license, the applicant shall complete and submit an Application for a Temporary License (Non-Mobile), Appendix 1, pages 12, 13 and 14 and Appendix 2-Plan Review and Sketch, page 15, at least 60 calendar days before the event or first day of business.

Step 1: Apply for a License 4 – 6 weeks prior to operation. **MAIL YOUR APPLICATION, APPENDIX 1 & 2, TO THE REGIONAL OFFICE AS NOTED ON THE LAST PAGE OF THIS APPLICATION.**

Step 2: When approval is obtained on your Application and the facility is ready for inspection, contact your Sanitarian to schedule a pre-operational (licensing) inspection. This may occur at the event itself.

Step 3: Once a satisfactory pre-operational inspection is performed, your Sanitarian will collect your licensing fee and you will be able to operate.

Step 4: Your formal Retail Food License will be mailed to you 2- 4 weeks after your pre-operational inspection. Your inspection report will serve as your license until you receive your actual license in the mail.

Step 5: Your license must be renewed annually. A renewal will be mailed to you. Temporary Licenses are renewed each December. Please return your renewal and payment by December 31.

TEMPORARY FOOD FACILITY CLASSIFICATIONS

Facilities that offers only prepackaged non-TCS foods (TFS Type 1) are exempt from the license fees; however, these types of facilities must still complete an Application and Plan Review and will be subject to inspection.

TFS requirements are risk based according to the food service operations that will occur.

Temporary Food Service (TFS) Type 1

- Packaged non- TCS foods

Temporary Food Service (TFS) Type 2

- Commercially processed packaged TCS in its original package (Receive-Store-Hold)

Temporary Food Service (TFS) Type 3

- Food Preparation with no cook step (Receive-Store-Prepare-Hold-Serve)
- Preparation for same day service (Receive-Store-Prepare-Cook-Hold-Serve)
- Reheating of a commercially processed food item (Receive-Store-Reheat-Hold-Serve)

Temporary Food Service (TFS) Type 4

- Complex food preparation (Receive-Store-Prepare-Cook-Cool-Reheat-Hot Hold-Serve)
- Large quantities of food being prepared (e.g., Olympics, Academy Awards, State Fairs)
- Using Time as a Public Health Control
- Serving a Highly Susceptible Population

TEMPORARY LICENSE FACILITY OPERATIONS CHECKLIST

The following checklist provides an overview of the general requirements that must be addressed. The local regulatory authority may impose additional requirements based upon the type of food preparation and/or sanitary facilities available.

PERSONNEL

- ❑ **PERSON-IN-CHARGE (PIC):** A designated person must be on site during all hours of operations of the TFS facility. The PIC is responsible for ensuring compliance with health code requirements. (§2-101.11, 2-103.11)
- ❑ **CERTIFIED FOOD PROTECTION MANAGER:** At least one person that has supervisory and management responsibility and authority to direct and control food preparation and service shall comply with Food Employee Certification for food facilities that are classified as TFS Type 3 or TFS Type 4. (§2-102.12)

- **EMPLOYEE HEALTH:** Employees with communicable diseases which can be transmitted through food shall be excluded and/or restricted from food activities. (§2-201.11, 2-201.12, 2-201.13, 2-401.12)

There must be employee practices and behaviors established that can help prevent the spreading of viruses and bacteria to food. The Centers for Disease Control and Prevention (CDC) and FDA cite six highly infective pathogens that can be easily transmitted by food employees and cause severe illness. These six pathogens known as the Big Five are Norovirus, the Hepatitis A virus, Salmonella Typhi, Salmonella Non-typhoidal, Shigella spp., and Escherichia coli (E. coli) 0157:H7 or other Enterohemorrhagic or Shiga toxin-producing E. coli.

Interventions must be used to prevent the transmission of foodborne illness. These interventions include (a) restricting or excluding ill food employees from working with food; (b) using proper handwashing procedures; and (c) eliminating bare hand contact with foods that are ready-to-eat (RTE).

Proper management involves ensuring that food employees do not work when they are ill and having procedures for identifying employees who may transmit foodborne pathogens to food, other employees, and consumers. Symptoms that the person in charge (PIC) should be concerned with include: vomiting, diarrhea, jaundice (yellow skin or eyes), sore throat with fever, infected cuts and burns with pus on hands and wrists.

Information and forms to aid in complying with Employee Health can be found in the FDA Model Food Code and the Employee Health and Personal Hygiene Handbook.

(<http://www.fda.gov/Food/FoodSafety/RetailFoodProtection/IndustryandRegulatoryAssistanceandTrainingResources/ucm113827.htm>)

- **HANDWASHING:** Food employees shall wash their hands upon entering the TFS or food preparation and service areas, immediately before engaging in food preparation, after using the toilet room, and as often as necessary to remove soil and contamination and to prevent cross contamination. (§2-301.11, 2-301.12, 2-301.14, 2-301.15)
- **HANDWASHING FACILITIES:** Handwashing facilities shall be located to allow convenient use by food employees in food preparation, food dispensing and warewashing areas. Handwashing sinks are to only be used for handwashing. A handwashing sign shall be posted at each handwashing sink. (§5-204.11, 5-205.11, 5-202.12, 5-203.11, 6-301.11, 6-301.12, 6-301.14, 6-301.20)
 - Packaged food only – Hand wash stations are not required if only commercially pre-packaged foods are kept in their original containers and will be provided to consumers in the package. Disposable moist towelettes must be provided.
 - Unpackaged food that is Non-TCS Food or TCS Food– Hand wash station/basins that provides gravity feed water. For example – A five gallon insulated container

with a spigot which can be turned on to allow potable warm water to flow over one's hands into a waste receiving bucket of equal or larger volume. Hand soap, single-use dispensed towels, and a waste receptacle shall be provided. (See Below)

Sample for Type 2 or 3

- ❑ **HYGIENE:** Food employees shall maintain a high degree of personal cleanliness and shall conform to good hygienic practices during all working periods. (§2-302.11)
 - Food employees shall have clean outer garments, aprons and effective hair restraints. (§2-304.11, 2-402.11)
 - Food employees are not allowed to smoke or eat (including chewing gum) in the food preparation and service areas. A food employee may drink from a closed beverage container if the container is handled to prevent contamination of the employee's hands; the container; and exposed food, clean equipment, utensils and single-service/single-use articles. (§2-401.11)
 - All non-working, unauthorized persons should be restricted from food preparation and service areas. (§2-103.11)
- ❑ **NO BARE HAND CONTACT:** Employees preparing food may not contact exposed, ready-to-eat food with their bare hands and shall use suitable utensils such as deli paper, spatulas, tongs, single-use gloves or dispensing equipment. (§3-301.11)

FOOD SOURCE

- ❑ **SOURCE:** All food shall be obtained from sources that comply with law. All meat and poultry shall come from USDA or other acceptable government regulated approved sources. (§3-201.11)
 - Neither home canned foods or Non-TCS foods prepared at home are allowed unless the producer is registered and inspected as a Limited Food Producer by the Department of Agriculture.
 - No TCS home cooked or prepared foods may be offered or used by a TFS facility. (§3-201.11)
 - All TCS food which is pre-cooked and pre-cooled off site for service at the temporary food facility shall be prepared at an approved, permanent food facility. (§3-201.11)
 - Ice for use as a food or a cooling medium shall be made from potable water. (§3-202.16)

- ❑ **TRANSPORTATION:** Food shall be transported in a manner that protects the food from contamination and if a TCS food item shall be maintained at 135°F or above or 41°F or below. (§3-202.15, 3-501.16)

FOOD PREPARATION

- ❑ **FOOD CONTAMINATION:** All cooking and serving areas shall be protected from contamination. Consumers shall be prevented from accessing areas of the TFS facility where food, food-contact surfaces, and equipment are located. (§2-103.11(B), 3-307.11)
- ❑ **CROSS CONTAMINATION:** Food shall be protected from cross contamination by separating raw animal foods from ready-to-eat foods and separating types of raw animal foods from each other during storage, preparation, holding, and display. (§3-302.11, 3-307.11)
 - Equipment and utensils (including knives, cutting boards, and food storage containers) shall be thoroughly cleaned and sanitized after being used for raw animal foods and before being used for ready-to-eat food. (§3-304.11, 4-602.11)

The following practices are only permitted with TFS Type 1 and TFS Type 2

- ❑ **HANDLING OF PACKAGED NON-TCS FOOD**
During storage food shall be protected from contamination. (§3-305.14, 3-307.11)
- ❑ **HOLDING OF COMMERCIALY PROCESSED PACKAGED TCS FOOD:**
TCS food shall be maintained at 135°F or higher or 41°F or below. (§3-501.16)

The following practices are only permitted with TFS Type 3

- ❑ **HOLDING OF TCS FOOD:** Time/Temperature Control for Safety Food shall be maintained at 135°F or higher or 41°F or below. (§3-501.16)
- ❑ **COOKING:** Food shall be cooked to the minimum temperatures and times specified below**: (§3-401.11, 3-603.11)
 - **165°F for 15 seconds** - poultry; wild game animals; stuffing containing fish, meat, poultry or ratites; stuffed fish, meat, pasta, poultry or ratites.
 - **155°F for 15 seconds** - mechanically tenderized and injected meats; the following if they are comminuted: fish, meat (hamburgers), game animals commercially raised for food; pooled raw eggs; ratites.
 - **145°F for 15 seconds** - raw eggs that are broken and prepared in response to a consumer's order and for immediate service; fish and meat.

**TFS operators should consult with their Sanitarian if considering cooking roasts (whole beef, pork, cured pork (ham) and corned beef) or if serving or selling undercooked foods to ensure compliance with the provisions of the Food Code.

- ❑ **THAWING:** TCS food shall be thawed either under refrigeration that maintains the food temperature at 41°F or less, or as part of a cooking process. (§3-501.13)
- ❑ **REHEATING FOR HOT HOLDING OF COMMERCIALY PROCESSED FOOD**
 - Food from a commercially processed, hermetically sealed container of food or from an intact package from a food processing plant shall be reheated to 135°F for hot holding. (§3-403.11)

The following two practices are only permitted at a TFS Type 4

- ❑ **COOLING:** TCS shall be cooled by an approved method in accordance with the following time and temperature criteria: (§3-501.14 3-501.15)
 - Cooked TCS food shall be cooled within 2 hours from 135°F to 70°F and within a total of 6 hours from 135°F to 41°F or less.
 - TCS food prepared from ingredients at ambient temperature shall be cooled within 4 hours to 41°F or less.
- ❑ **REHEATING FOR HOT HOLDING:** TCS food that is cooked and cooled at a permanent food facility prior to delivery to the temporary food facility shall be reheated so that all parts of the food reach a temperature of at least **165°F for 15 seconds if hot held.** (§3-403.11)
 - Reheating shall be done rapidly so that the food is between 41°F and 165°F for no more than 2 hours.
 - Cooked and refrigerated food that is prepared in response to an individual consumer order may be served at any temperature.

EQUIPMENT

Equipment used for cooking or for holding of TCS food shall be evaluated for approval based on a menu review, food service operations that will occur, and the length of the event. (§4-301.11)

- ❑ **COOKING DEVICES:**
 - For safety reasons, cooking equipment, such as BBQs, propane stoves, and grills, should be roped off or otherwise segregated from the public (§3-307.11) if cooking is occurring outside.
- ❑ **COLD STORAGE:**
 - Packaged food may not be stored in direct contact with ice or water if the food is subject to the entry of water because of the nature of its packaging, wrapping, or container or its positioning in the ice or water. (§3-303.12)
 - Each refrigeration unit should have a numerically scaled thermometer accurate to ±3°F if scaled only in Fahrenheit or accurate to +/- 1.5°C if dually scaled in Celsius and Fahrenheit to measure the air temperature of the unit. (§4-203.12, 4-204.112)
 - An effectively insulated, hard sided, cleanable container with sufficient ice or

other means to maintain TCS food at 41°F or below may be approved for the storage of small quantities of TCS food. (§3- 501.16, 4-301.11). Mechanical refrigeration units may be needed to keep TCS food at 41°F or below. (§3-501.16, 4-301.11)

- ❑ **HOT STORAGE:** Hot food storage units shall be used to keep TCS food at 135°F or above. Electrical equipment, propane stoves, grills, etc. shall be capable of holding foods at 135°F or above. (§3-501.16, 4-301.11)
- ❑ **THERMOMETERS:** A thermocouple or metal stem thermometer shall be provided to check the internal temperatures of TCS hot and cold food items. Food temperature measuring devices that are scaled only in Celsius or dually scaled in Celsius and Fahrenheit shall be accurate to +/-1°C or if scaled only in Fahrenheit shall be accurate to +/-2°F in the intended use of range. Temperature measuring devices shall be equipped with a small diameter probe if thin foods are served. (§4-302.12, 4-502.11)
- ❑ **COUNTERS/SHELVES:** All food contact surfaces shall be non-toxic, smooth, easily cleanable, durable, nonabsorbent, and free of seams and difficult to clean areas. All other surfaces shall be finished so that they are easily cleanable. (§4-101.11)

FOOD AND UTENSIL STORAGE

- ❑ **DRY STORAGE:** All food, equipment, utensils, and single service items shall be stored at least 6" off the ground or floor on pallets, tables, or shelving. Food shall be protected from contamination and shall have effective overhead protection. (§3-305.11, 3-305.12)
- ❑ **FOOD DISPLAY:** All food and food contact surfaces shall be protected from consumer handling, coughing, sneezing or other contamination. (§3-306.11, 3-306.12, 3-306.13)
 - Use sneeze guards or other effective barriers for food on display.
 - Keep food covered, except for working containers of food.
 - Condiments shall be dispensed in single service type packaging, in pump-style dispensers, or in protected squeeze bottles, shakers, or similar dispensers which prevent contamination of the food items by food employees, patrons, insects, or other sources.
 - Knives, forks, and spoons that are not pre-wrapped shall be presented so that only the handles are touched.
- ❑ **IN-USE UTENSILS:** Food dispensing utensils shall be stored in the food with their handles above the top of the food and container; on a clean portion of the food preparation table or cooking equipment; or in a container of water if the water is maintained at a temperature of at least 135°F and the utensil and container is cleaned as necessary to preclude accumulation of soil residues. (§3-304.12)

CLEANING AND SANITIZING

Equipment food-contact surfaces and utensils shall be cleaned and sanitized when changing from working with raw foods to working with ready-to-eat foods; between uses with raw fruits and vegetables and with TCS food; before using or storing a food temperature measuring device; and if used with TCS food shall be cleaned throughout the day at least every 4 hours; and at any time during the operation when contamination may have occurred. (§4-602.11)

- ❑ **WAREWASHING:** A commercial dishwasher or manual warewashing method should be utilized to wash, rinse, and sanitize equipment and utensils coming into contact with food.

The minimum requirements for a utensil washing set-up to wash/rinse/sanitize should consist of 3 basins, large enough for complete immersion of utensils, a potable hot water supply, and an adequate disposal system for the wastewater.

- ❑ **SANITIZING:** Chlorine bleach or other approved sanitizers should be provided for sanitizing food contact surfaces, equipment, and wiping cloths. Sanitizers shall be used in accordance with the EPA-registered label use instructions. An approved test kit shall be available to accurately measure the concentration of sanitizing solutions. (§4-501.116, 4-703.11)
- ❑ **WIPING CLOTHS:** Wiping cloths that are in use for wiping food spills shall be used for no other purpose and shall be stored clean and dry or in a clean sanitizing solution at the approved sanitizer concentration. (§3-304.14)

WATER SUPPLY AND WASTEWATER DISPOSAL

- ❑ **WATER:** An adequate supply of potable water shall be available on site for cooking and drinking purposes; for cleaning and sanitizing equipment, utensils, and food contact surfaces; and for handwashing. (*applicable sections in Chapter 5 FDA Food Code*)
 - Water shall come from an approved DEP (Department of Environmental Protection) public water supply or a DEP approved well. If the water supply is not regulated by DEP you will need to supply water test results along with your Application for Total Coliform and Nitrate/Nitrite.
 - **TFS type 1 & 2: 1 Total Coliform and 1 Nitrate/Nitrite test**
 - **TFS type 3 & 4: 4 Total Coliform tests in 24 hrs and 1 Nitrate/Nitrite**
 - The water supply system and hoses carrying water shall be constructed with approved food contact materials. *Recommend labeling potable water hose.*
 - The water supply shall be protected with backflow devices to preclude the backflow of contaminants into the potable water supply. (§5-202.13, 5-202.14, 5-203.14, 5-203.15)
 - All hose and other connections to the potable water supply shall be maintained a minimum of 6" above the ground or top plane surface.

- A supply of commercially bottled drinking water or sanitary potable water storage tanks may be allowed if approved by the Sanitarian.
- **WASTEWATER DISPOSAL:** Wastewater shall be disposed in an approved waste water disposal system. Wastewater may not be dumped onto the ground surface, into waterways, or into storm drains; but shall be collected and disposed through an approved sewage disposal system. (§5-402.13)

PREMISES

- **FLOORS:** Inside floors must be smooth non-porous and easily cleanable. If outside of a building or structure floors must be graded to drain, a floor may be concrete, machine-laid asphalt, or dirt or gravel if it is covered with mats, removable platforms, duckboards, or other approved materials that are effectively treated to control dust and mud. (§6-101.11).
- **WALLS AND CEILINGS:** Walls and ceilings inside of building or structures shall be smooth, non-porous and easily cleanable. If outside, the TFS shall be covered with a canopy or other type of overhead protection, unless the food items offered are commercially prepackaged food items and dispensed in their original containers.
 - If outside, walls and ceilings, when required, are to be of tight and sound construction to protect against the elements, windblown dust and debris, insects, or other sources that may contaminate food, food contact surfaces, equipment, utensils, or employees. (§6-101.11)
 - Inside a building or structure, window and door openings shall be protected from insects and rodents by 16 mesh to 1 inch screen, properly designed air curtain, or other effective means. (§6-202.15)
- **LIGHTING:** Adequate lighting by natural or artificial means shall be provided. Light bulbs shall be shielded, coated, or otherwise shatter-resistant in areas where there is exposed food; clean equipment and utensils; or unwrapped single-service and single-use articles. (§6-202.11)
- **REFUSE:** An adequate number of non-absorbent, easily cleanable refuse containers shall be provided both inside and outside of each TFS site. Refuse containers shall be removed at a frequency that will minimize the development of objectionable odors and other conditions that attract or harbor insects and rodents. Dumpsters shall be covered, rodent-proof, and non-absorbent. Grease shall be disposed of properly and shall not be dumped onto the ground surface. (§5-501.13, 5-502.11, 5-502.12)
- **TOILET FACILITIES:** An adequate number of approved toilet and handwashing facilities shall be provided for food employees. The toilet facilities, preferably permanently established, should be conveniently located to the food preparation areas and be supplied with toilet tissue. Toilets may consist of properly designed, operated, and maintained portable toilets. (§5-203.12, 5-204.11, 6-302.11)

- ❑ **CLOTHING STORAGE:** Personal clothing and belongings should be stored at a designated place in the TFS away from food preparation, food service and warewashing areas. (*§6-305.11, 6-403.11*)

- ❑ **TOXIC MATERIALS:** Poisonous or toxic materials shall be properly labeled and stored so they cannot contaminate food, equipment, utensils, and single-service and single-use articles. Only those chemicals necessary for the food service operation shall be provided. (*§7-202.11, 7-202.12*)

- ❑ **PESTS:** The TFS shall be maintained free of insects, rodents, and other pests. (*§6-202.15*)

APPLICATION FOR A TEMPORARY LICENSE (NON-MOBILE)- APPENDIX 1 CONTINUED

Construction of TFS:

- Permanent building or structure (smooth, non-porous and easily cleanable surfaces)
 Non-Permanent
 Overhead Covering: Canvas Wood Other: _____
 Floor: Asphalt Concrete Wood Other: _____
 Walls: Screens Concrete Wood Other: _____

Utensils and Equipment

- Single-serve eating and drinking utensils
 Multi-use kitchen utensils
Type of Utensil Washing Set Up:
 Three basin set-up
 Shared three compartment sink
 Three compartment sink within a food facility

Sanitizer to be used:

- Chlorine Quaternary Ammonia Iodine

Type of handwashing facility:

- Gravity-fed water with spigot/bucket
 Self-contained portable unit (with potable water and waste water holding tanks)
 Plumbed with hot and cold water under pressure

Hand Soap, single-use towels, and trash receptacle must be provided at all handwashing sinks.

On a separate piece of paper, please list the following, if applicable:

- All food service equipment, including:**
Food storage, display equipment, cooking, coolers, freezers, hot holding units, preparation equipment, etc... -List equipment and make/model number that will be used
- Location of toilet facilities for food employees**
- Method of garbage removal**

Liquid Waste Removal

- Public Sewer disposal
 Private Sewer disposal

Water Supply

- DEP regulated water supply (ex: municipal water, approved DEP Regulated Well)
 *Private water supply; List location _____
 *Water test must be performed (Total Coliform, Nitrate/Nitrite, see Guideline above, pg. 10)

Fee Schedule: (DO NOT Sent money with Application)

- Temporary License: \$14.00 (14 days)
- 2nd Follow-up inspection Fee --\$150.00
 - 3rd or subsequent Follow-up inspection Fee --\$300.00
 - Duplicate License Fee - \$14.00
 - Courtesy inspection Fee - \$150.00

Food Employee Certification (FEC)

Note: Official non-profits are exempt
 Certified Food Manager available Yes No
 Name: _____

A temporary license will not be issued unless this application meets all local applicable requirements and those found in the FDA Model Food Code and the permit has been signed and approved by the Department. Additionally, the undersigned is aware that non-compliance may result in prosecution or closure of the temporary licensed facility.

Applicants Name (Print): _____ **Applicants Signature:** _____ **Date:** _____

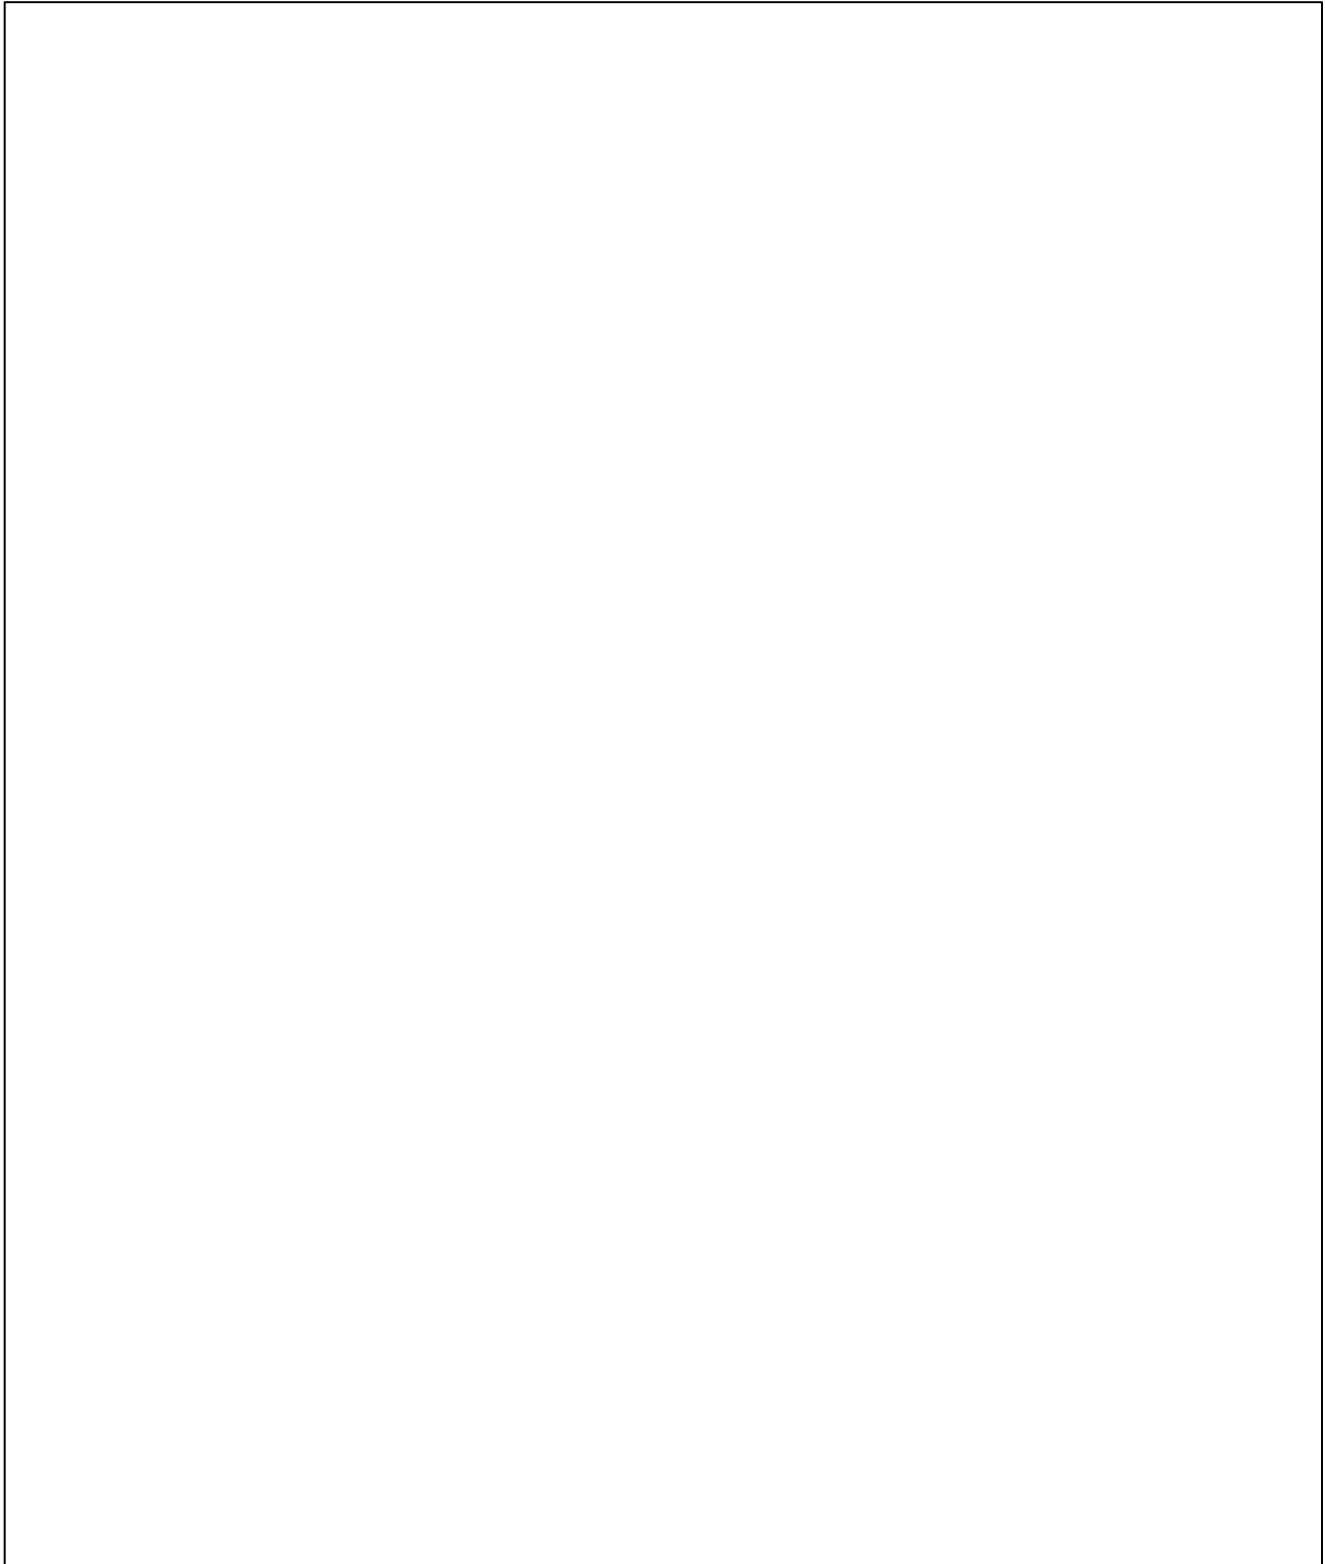

SUBMIT COMPLETED APPLICATION AND DOCUMENTS TO YOUR REGIONAL OFFICE
