

Look Before You Leave

SPOTTED LANTERNFLY, *LYCORMA DELICATULA*

Adult with Egg Masses | **Eggs: October - May**

Adults on Tree of Heaven (*Ailanthus*)

Egg Masses | **Eggs: October - May**

Early Nymph | **May - June**

Late Nymph | **June - July**

Spotted lanternfly threatens the Commonwealth of Pennsylvania. It has been found in your area. Please help in the eradication effort. Look for the insect before you leave the quarantine area. This insect is not a strong flier, it will hitch hike a ride on you, your vehicle, trees, or items which may sit outside. If you would like additional information, please visit:
