Check yourself before getting into any vehicle to make sure there are no spotted lanternfly nymphs or adults on you.

If you find any life stage of spotted lanternfly, destroy them immediately. For egg masses, be sure you crush all eggs evenly. Alternatively, all life stages of spotted lanternfly can be placed permanently in a container with rubbing alcohol or hand sanitizer to destroy them.

By signing this checklist, I am confirming that I have inspected my vehicle and those items I am moving from the spotted lanternfly quarantine area, and I do not see any spotted lanternfly egg masses or other life stages in or on anything I am moving.
