

COMMONWEALTH OF PENNSYLVANIA

DEPARTMENT OF AGRICULTURE | RUSSELL C. REDDING, SECRETARY

June 2010

Dear Friend of Pennsylvania Agriculture:

On behalf of the Pennsylvania Department of Agriculture Bureau of Ride and Measurement Standards, I am pleased to provide you with the 2009 Weights and Measures Annual Report. This comprehensive report details the activities of the Division of Weights and Measures, including inspection activities and information as required under the Consolidated Weights and Measures Act, Title 3 Pa C.S.A. Chapter 41.

Each day, weights and measures officials throughout the state work hard to ensure equity in the marketplace, assuring when consumers use weighing and measuring devices – from fuel pumps to deli scales – they are getting exactly what they pay for. This is an important part of what we do as a state agency, and we remain committed to our role in protecting the integrity of transactions in the commonwealth.

Over the past several years, Governor Edward G. Rendell has made significant investments in consumer protection. In 2007, these investments brought much needed staff and equipment to the bureau to strengthen our ability to protect consumers, businesses and manufacturers throughout the state. In 2008 and 2009, these were enhanced through greater consumer outreach and new inspection tools.

Looking forward, efforts are already underway to ensure transparency and accountability in commercial activities. For the first time this year, weights and measures inspection reports are easily accessible online at [www.agriculture.state.pa.us](http://www.agriculture.state.pa.us) by searching "Weights & Measures." Already consumers and businesses are using this unique tool to protect themselves from inaccurate measures.

Thank you for your interest and attention to the important responsibilities of this division. It is a critical part of our efforts to keep Pennsylvania growing.

Sincerely,

A handwritten signature in blue ink that reads "Russell C. Redding".

Russell C. Redding

### Overview

From the fuel to heat homes and power cars to the scales and scanners used at grocery and other stores, almost everything bought and sold is measured in weight, volume, length or count. To ensure that customers, businesses and manufacturers get exactly what they pay for, state and local officials, in conjunction with authorized inspection programs, work behind the scenes every day to help ensure the Commonwealth’s markets remain fair.

The Division of Weights and Measures, part of the Pennsylvania Department of Agriculture’s Bureau of Ride and Measurement Standards, was created to help ensure equity in the marketplace through laws and regulations, uniform inspection and test procedures, and certified and knowledgeable inspectors.

The division is empowered through the Consolidated Weights and Measures Act, Title 3 Pa C.S.A. Chapter 41 with additional regulations found in Title 70. The act requires Pennsylvania jurisdictions to follow inspection and procedural guidelines adopted by the National Conference on Weights and Measures. The act requires the division to describe all relevant activities of state inspectors of weights and measures, certified examiners of weights and measures and city and county sealers of weights and measures for the preceding calendar year in an annual report.

The Department’s work on the weights and measures front is one of its core consumer protection functions. This work is critical to ensuring that commerce in Pennsylvania is not negatively impacted by faulty equipment or individuals attempting to manipulate the marketplace.

All scales – ranging from small-retail to large-capacity truck scales, truck-mounted fuel meters, liquid-petroleum gas meters, retail fuel pumps, and all consumer scanning systems at retail store check-outs – must be inspected annually in each of the 49 counties in the state’s jurisdiction. The department provides oversight for 50 local sealers in the remaining 18 counties and two city weights and measures programs.

Over time, the demand on the weights and measures division has greatly increased, as 49 counties have turned over inspection responsibilities to the commonwealth since 1982. These 49 counties represent almost half of the state’s population – more than 5.6 million people. A chart of the increase in commonwealth weights and measures responsibilities is shown in Figure 1 below. A full list of counties that have dropped their own weights and measures program is included with this report, as well as a map showing the areas covered by the state and those counties that have retained a weights and measures program. Currently, the counties of Adams, Allegheny, Beaver, Blair, Bucks, Centre, Cumberland, Delaware, Elk, Greene, Huntingdon, Lancaster, Montour, Northampton, Northumberland, Sullivan, Westmoreland and York, as well as the cities of Meadville and Scranton, perform their own inspections.

**Increase in Commonwealth Weights and Measures Responsibilities**

Figure 1 shows the trend in time for counties to turn their Weights and Measures programs over to the Commonwealth. \* - In 1996, the Consolidated Weights and Measures Act was amended, revising the law to note that counties “may” have a Weights and Measures program (the Act previously stated that counties “shall” have a program), giving local governments the ability to cease inspections and mandating that the state pick up these inspections. There is no allowance in the amended Act for the state to recoup costs for the increase in inspections.

This look at the change in the demand on state resources over time shows that there is a very real challenge for the department in managing the personnel and tools in place to handle these inspections. As a part of the department’s ongoing work to be efficient, effective fiscal managers, the Certified Examiner of Weights and Measures provision outlined in the 1996 amendment of the Consolidated

Weights and Measures Act is being utilized. More details on this program are included later in this report.

A historical look at the division shows a dramatic increase in the devices and systems inspected by the state over the past 10 years, compounded by a decrease in the number of inspectors and supervisors in 2009. This information is represented in Figures 2, 3 and 4.

Figure 2 - Inspectors and Supervisors

Figure 3 - Devices and Systems Inspected by PDA

Figure 4 - Devices/Staff

Note: - In 2005, 43,403 of the 95,435 inspections were of parking meters. This increase in the number of parking meters inspected impacts the devices/staff formula, as the Department was at 20 inspectors that year.

In addition to changes on the weights and measures front, it is important to note a new duty of the division pertaining to Pennsylvania’s new biofuels mandate. In July of 2008, Governor Edward G. Rendell made an important investment in homegrown fuel and local communities by signing House Bill 1202 (Act 78) into law, establishing new requirements that every gallon of gasoline and diesel fuel contain a specific percentage of ethanol and biodiesel, respectively. The biofuel percentage requirements established under the new law go into effect once in-state production reaches certain levels, the first of which was met in September 2008. As of May 1, 2010, all on-road diesel fuel sold in the state now contains two percent biodiesel, known to the industry as a B2 blend.

To ensure equitable biofuel markets, the division will monitor compliance with the act, including the promulgation of regulations, certification that the necessary

infrastructure exists to support the mandate, and testing and assuring the quality of biodiesel distributed throughout Pennsylvania.

## Consumer Education and Outreach

Protecting consumers, businesses and manufacturers from inaccurate measuring devices means fostering an atmosphere where citizens are an active part of the inspection process. This is done by the department's efforts to empower the public to do their part in ensuring the accuracy of commercial measuring devices.

In 2010, the department launched a new online tool enabling consumers to access state weights and measures inspection reports. Before shopping, citizens and visitors can go to [www.pda.state.pa.us/WMIinspections](http://www.pda.state.pa.us/WMIinspections) to see the latest inspection report for that business and device.

Currently, the weights and measures inspection tool features reports from the 49 counties under state jurisdiction. Inspections from Adams, Allegheny, Beaver, Blair, Bucks, Centre, Cumberland, Delaware, Elk, Greene, Huntingdon, Lancaster, Montour, Northampton, Northumberland, Westmoreland and York counties, as well as those from the cities of Meadville and Scranton, will be added to the database in the future.

The "Tested and Approved" and "Rejected" decals placed on each item that is inspected by the department feature the state's toll-free number, 1-877-TEST-007, which consumers can use to register

complaints or concerns about scales, gas pumps and other state-regulated measuring devices. The red rejected decal serves as a warning to consumers that the device in question needs service or attention. While not every issue with a weighing and measuring device has a direct correlation to inaccurate prices to consumers, the department uses this decal to help those who are entering into financial transactions make informed decisions. Devices found to be out of operational condition or beyond the acceptable tolerance levels set forth by the state are immediately taken out of service.

In 2009 the department also created an online complaint form that consumers can use to alert the state to potentially inaccurate devices. The online form and toll-free number yielded 295 complaints regarding state-inspected devices. Each consumer complaint was thoroughly reviewed, with 233 resulting in investigations by the Department. An additional 282 consumer complaints were handled by county and city programs. Combined, there were a total of 515 statewide complaints regarding weighing and measuring devices.

To future help consumers understand their rights in the marketplace, the department created and distributed a brochure entitled "Getting What You Pay For." The brochure provides suggestions for being an informed consumer and is available in paper and online. Inspectors working in public settings carry this handout with them and engage consumers that may have questions.

## **Weights and Measures Inspections**

The Pennsylvania Department of Agriculture's Division of Weights and Measures is responsible for inspecting scales ranging from small-retail to large-capacity truck scales, truck-mounted fuel meters, liquid petroleum gas meters, retail fuel pumps, and all consumer scanning systems in 49 counties. Eighteen counties and two cities inspect all or varying degrees of devices located in their counties. A copy of a Weights and Measures Memorandum of Understanding is included with this report. Each MOU is specific to the agreed-upon responsibilities and unique to the county or city that is covered.

### ***Inspection Details***

The Pennsylvania Department of Agriculture Division of Weights and Measures promotes uniformity in commercial measurement devices. County and city sealers are primarily involved in three types of inspections: small scales, or those under 1,000-pound capacity; fuel pumps and scanner accuracy. Additionally, local sealers investigate consumer complaints, including gasoline, firewood and mulch delivery shortages. County programs may also inspect random and standard packages to verify weight or volume declarations, meters on home heating fuel delivery trucks, load rack meters that dispense petroleum products into tanker trucks, timing devices and vehicle scales.

Department inspectors oversee small, medium and large capacity scales; fuel pumps; scanner accuracy; home heating fuel and liquid propane delivery trucks; load rack meters; random, standard and liquid packages; and grain moisture meters.

In 2009, the division provided oversight to 85,924 reported device, system and commodity inspections, and performed inspections at 15,304 establishments. Included in the Appendix of this report is a spreadsheet showing the activity of the division of weights and measures personnel, as broken out by region.

There are more than 12 different types of devices that are inspected by the state, including:

Device	2009 PDA Inspections	County/City Inspected
Scales, Small Capacity (0 – 1,000 lbs)	19,606	23,251
Scales, Medium Capacity (1,001 – 5,000 lbs)	760	834
Scales, Large Capacity (5,001 lbs +)	1,934	138
Timed Devices	7,011	13,414
Meters, Retail Fuel Dispensers	49,304	37,128
Meters, Vehicle Tank	2,296	583
Meters, Liquid Program Gas	779	0
Meters, Load Rack	76	0
Meters, Grain Moisture	5	0
Price Verification Systems	2,544	3,155
Package Checking	1,601	229
Miscellaneous	8	2,271
<b>TOTAL</b>	<b>85,924</b>	<b>81,003</b>

In addition to the inspections handled by the state, in 2009 there were 81,003 inspections completed by the 18 counties and two cities that provide their own weights and measures services. A full listing of these inspections is included with this report.

### ***Enforcement Actions***

As devices and systems are found to be faulty or beyond the acceptable tolerance levels set by the department, actions are taken to formally acknowledge the concerns of the state and bring the device into compliance. Written warnings are the first step in acknowledging an issue with a device or with a business/vendor. These warnings cover a full range of devices and infractions.

In 2009 the department issued 33 written warnings. These written warnings resulted in three prosecutions and one imposed fine. Warnings were issued for devices with security seals missing, those that needed recalibration to split weighing and for failure to have a weighmaster license. There were three violations recorded in 2009. Two of these violations were for price verifications and one was for weighslip. One fine was issued. An additional case remains with the Office of the Attorney General and is a part of a civil action.

Enforcement activity for previous years is as follows:

Year	Written Warnings	Prosecutions	Fines
2009	33	3	1
2008	44	25	33
2007	53	3	3

### ***Certified Examiner of Weights and Measures Program***

As mentioned earlier in this report, the department is responsible for inspecting weighing and measuring devices in 49 counties across the state. This increased inspection load combined with furlough actions the department had to take in response to a struggling economy and limited state fiscal resources has created a situation where, in order to best serve our citizens and those who participate in commercial transactions in Pennsylvania, the most prudent option available is to take advantage of the Certified Examiners of Weights and Measures, or CEWM, program.

Act 155 of 1996 amended PA C.S.A. Chapter 41, § 4110 (a)(4) and authorizes the Department to use private industry professional who have been trained and certified to conduct field level inspections on behalf of the department:

*“Institution of a program containing standards whereby individuals shall be department-certified as Certified Examiners of Weights and Measures. Certification under such program may be for a given category or categories of measuring or weighing devices or for a particular type of device. The department shall certify only such individuals who successfully complete the appropriate training or courses prescribed by the National Institute of Standards and Technology for the type of certification sought and who comply with departmental certification standards promulgated under this paragraph. Any program instituted under this paragraph shall include testing and inspection testing by State inspectors of weights and measures of a sample of devices inspected and tested by Certified Examiners of Weights and Measures and any other type of standards or procedures the department deems necessary to implement the program.”*

With this use of department trained, tested and certified professionals, the role of the weights and measures division personnel moves to serve as the quality control auditors who monitor this program’s implementation and provide the final assurances that the law is being upheld and that the certified examiners are protecting the consumers they represent.

The legislation detailing the CEWM program allows the department to train and certify eligible industry members to inspect truck-mounted liquid petroleum gas meters, vehicle scales, truck-mounted fuel oil meters, small capacity retail computing scales, retail package shipping scales and small platform scales that weigh items to 1,000 pounds, retail motor fuel dispensers and compressed natural gas meters. The CEWM program applies only to devices under the direct

responsibility of the department to inspect. Where an MOU exists with a county weights and measures program, the devices agreed to be inspected by the county may not be inspected by a CEWM. Included with this report is a copy of a letter sent to county sealers to clarify this point and confirm that CEWM inspectors will only be authorized to inspect and certify those devices under the direct responsibility of the commonwealth.

As CEWM status is available only to trained individuals and not companies or organizations, those interested in this program must register for, attend and complete training sessions hosted by the department, as evidenced by pre-test and final examination grades showing a more than 80 percent pass rate. The program of training for CEWM participants complies with the National Institutes of Standards and Technology (NIST) protocols. CEWM status is not issued until a completed background check is returned from the Pennsylvania State Police and proof of current field standards certification is provided. The individuals certified to act as CEWM inspectors on behalf of the state must personally perform the inspections assigned to them and certify the results. This step makes the inspector personally responsible for the results and liable for any punitive action for fraudulent practices, including revocation of certification and civil penalties of up to \$10,000 per violation. In addition, all CEWM inspections will be made public on the department's website, through the weights and measures division inspection report database. This increased transparency ties the individual inspector to the devices they are certifying, creating an additional layer of responsibility to those in the private sector who have been certified to act on the state's behalf.

Understanding the need to monitor these inspections, the department will be heavy-handed in its duty to conduct random and thorough inspections and audits of all CEWM program inspections, as mandated.

There has been increased interest by the private sector in this program, enabling the department to host two training sessions for CEWM participants. The liquid propane gas training and testing session on February 17, 2010, resulted in 12 LPG-specific CEWM inspectors. The vehicle scales training and testing session on March 30, 2010, resulted in 27 vehicle scale-specific CEWM inspectors.

All 1,200 businesses currently participating in weights and measures activity in Pennsylvania have the ability to promote the CEWM program and their individual staff members can participate and be certified. There are approximately 1,200 professional businesses registered with the department with regards to weights and measures (a complete list is included with this report). The department will take advantage of this connection to trained weights and measures professionals to ensure that the initial round of marketing and outreach is targeted to an audience with a proven interest in the business sectors being impacted.

### ***Certified UPC/PLU Inspector Program***

In line with the Consolidated Weights and Measures Act, the Pennsylvania Department of Agriculture's Division of Weights and Measures developed a Certified Universal Product Code (UPC) and Price Look-Up (PLU) Inspector Program. Scanning systems and devices must be inspected annually by the division or private business, as approved by the act. PLU/UPC device inspectors must complete a training course conducted by the division every three years, four of which were conducted in 2009. There are 161 certified UPC/PLU inspectors and 28 programs in the commonwealth, including:

- AutoZone
- Bass Pro Shops
- Bloomingdale's
- Bomberger Store
- Bon-Ton
- Boscov's
- Browns Orchards & Farm Market, Inc.
- Cabelas
- CVS Pharmacy
- Friends of Wildwood Lake Nature Center
- Good Stores, Inc.
- Hornung's True Value
- J.B. Hostetter & Sons, Inc.
- Kaufmanns
- Kratzer Hardware
- Lazarus
- Liquor Control Board
- Macy's East
- Mapes Stores, Ltd.
- Mountain View Supply, Inc.
- New York & Company
- Paul B. LLC
- Stein Mart
- Strawbridges
- Target
- Turkey Hill
- Weavers Hardware

The Pennsylvania Food Merchants Association conducts inspections at the following businesses:

- Acme
- Carone's Market
- Country Fair
- Ferguson & Hassler
- FoodKart
- Foodland
- Foodsource
- Gerrity's Supermarket
- GetGo
- GEXpress
- Giant Eagle
- Giant Food Stores
- Gould's Supermarket
- Grove City County Market
- Jane's Market
- Kennie's Market
- King's Market
- Martin's Food Market
- Mountain Fresh Supermarket
- Mutzabaugh's Market
- Nell's Shurfine Market
- Oregon Dairy
- Price Chopper
- Save Smart
- Save-A-Lot
- Saylor's Market
- Shop 'n Save
- ShopRite
- Shur Save
- Sunoco
- Tops Market
- Wawa
- Weis Markets

### **Pennsylvania Biofuel Development Program**

In July 2008, Pennsylvania took another major step forward in breaking its dependence on foreign oil in favor of cleaner, domestically produced alternative

fuels. Governor Edward G. Rendell signed House Bill 1202 into law, establishing new requirements that every gallon of gasoline and diesel fuel contain a specific percentage of cellulosic ethanol and biodiesel, respectively. The biofuel percentage requirements established under the new law (Act 78) would go into effect once in-state production reaches certain levels.

All diesel fuel sold at retail must contain:

- 2 percent biodiesel, once in-state production reaches 40 million gallons;
- 5 percent biodiesel, once in-state production reaches 100 million gallons;
- 10 percent biodiesel, once in-state production reaches 200 million gallons; and
- 20 percent biodiesel, once in-state production reaches 400 million gallons.

All gasoline sold at retail must contain 10 percent cellulosic ethanol, once in-state cellulosic ethanol production reaches 350 million gallons.

The first biodiesel threshold – 40 million gallons produced in-state on an annualized basis – was achieved in September 2008, triggering the mandate. Each of these production levels must be sustained and verified over a three-month period by the department.

As of May 1, 2010, every gallon of on-road diesel fuel sold in the state now contains at least two percent biodiesel. As much as one billion gallons of biofuels will be added to the state's fuel supply under Act 78.

The Pennsylvania Department of Agriculture is responsible for assuring compliance with the act, including the promulgation of regulations, certification that the necessary infrastructure exists to support the mandate, and testing and assuring the quality of biodiesel distributed throughout Pennsylvania.

In August 2009, the Department of Agriculture and Pennsylvania Department of Transportation (PennDOT) jointly certified that there is sufficient infrastructure in Pennsylvania to meet the requirements. The agencies conducted three public hearings across Pennsylvania for the development of the infrastructure preparedness report, which was submitted to the Pennsylvania General Assembly. In addition, the department and the National Biodiesel Board hosted a Pennsylvania Biodiesel Development Conference in April 2010, to coordinate implementation efforts, ensure quality and effective distribution prior to the May 1 effective date.

Pennsylvania has programs available that offer support for infrastructure improvements and renewable energy projects, including the Pennsylvania Energy Development Authority, PennDOT's Rail Transportation Assistance Program, and the Department of Environmental Protection's Alternative Fuels Incentive Grant Program and through the Department of Community and Economic Development's Commonwealth Financing Authority and Alternative and Clean Energy programs.

**COMMONWEALTH OF PENNSYLVANIA  
DEPARTMENT OF AGRICULTURE**

**MEMORANDUM OF UNDERSTANDING  
WEIGHTS AND MEASURES**

This Memorandum of Understanding is entered into as of the date of latest signature below. The parties to this Memorandum of Understanding are the Commonwealth of Pennsylvania, Department of Agriculture (“PDA”), with its business address at 2301 North Cameron Street, Harrisburg, PA 17110-9408, and the County of Bucks, Pennsylvania (“County”), having its offices at 55 East Court Street, Doylestown, PA 18901.

---

**I. Recitals**

- A. The Consolidated Weights and Measures Act (3 Pa.C.S.A. §§ 4101 - 4194) (“Act”) empowers and requires PDA to inspect and test, to ascertain if they are correct, weights and measures that are used in commerce within the Commonwealth of Pennsylvania.
- B. Section 4122(a) of the Act authorizes the board of county commissioners of the County to appoint one or more persons to serve as sealers of weights and measures in the County (“county sealers”).
- C. Section 4121(b) of the Act authorizes PDA to delegate certain powers and duties to county sealers, and requires that any such delegation be fully-delineated in a memorandum of understanding.
- D. The County and PDA intend this document as the required Memorandum of Understanding pursuant to which PDA shall delegate specific weights and measures inspection and enforcement responsibilities to the County.

**II. Understanding.**

PDA and the County agree to the following terms and conditions:

- 1. The recitals set forth above are incorporated into this understanding by reference.
- 2. The County has appointed one or more persons to serve as sealers of weights and measures as authorized under Section 4122(a) of the Act.
- 3. Pursuant to Section 4121(b) of the Act, PDA delegates to the County, and the County accepts, the powers and duties given to and imposed upon PDA under the following sections of the Act:

Section 4112 (relating to general testing and inspections);  
Section 4116 (relating to investigations);  
Section 4117 (relating to inspection of packages);  
Section 4118 (relating to stop-use, stop-removal and removal orders);  
Section 4119 (relating to disposition of correct and incorrect apparatus);  
Section 4120 (relating to police powers; right of entry and stoppage); and  
Section 4192 (relating to temporary or permanent injunctions).

4. The specific division of inspection responsibilities between PDA and the County is as follows:

a. PDA will inspect the following weights, measures and weighing and measuring devices:

Vehicle Scales  
Grain moisture meters  
LP-gas tank meters  
Training, support and cooperation  
CNG fueling points  
Platform and hopper scales over 2000 lbs. Capacity

b. The County will inspect the following weights, measures and weighing and measuring devices:

Jewelers Scales  
Random and standard packaged commodities  
Timing devices  
UPC scanning systems  
Vehicle tank meters  
Small capacity scales up to 30 lbs. capacity  
Motor fuel dispensers  
Linear Measuring Devices  
Point-of-sale systems  
Platform and hopper scales up to 2000 lbs. Capacity

5. The County understands it must satisfy the standards and requirements established by the Department to assure uniform statewide enforcement of the Act and its attendant regulations.

6. The County shall annually, and at such other times as PDA may require, submit a written report to PDA, summarizing the following:

- a. The work performed by its county sealers;
- b. The weighing and measuring devices inspected or tested;

- c. The results of such inspections or tests;
- d. The nature and results of all prosecutions instituted by the county sealers for violations of the Act; and
- e. All other matters and things pertaining to the duties of the sealer or which may be required by PDA.

7. The applicable provisions of the Act not specifically set forth herein, are incorporated into and made a part of this memorandum.

8. The County shall maintain separate books, records, documents and other evidence with regard to this memorandum. Inspection records, supporting documents, and all other records shall be retained for a period of three (3) years from the date of this memorandum.

9. Authorized representatives of PDA or the Commonwealth shall have access to any pertinent books, documents, papers and records to make audits, examinations, excerpts and transcripts.

10. This memorandum shall commence on July 1<sup>st</sup>, 2007, and shall terminate on June 30<sup>th</sup>, 2012.

11. PDA may terminate this memorandum if it determines the county sealer enforcement program does not satisfy the standards and requirements established by PDA as necessary to assure uniform statewide enforcement of the Act. Either party may terminate this memorandum for any reason, upon 60 days written notice to the other party.

12. PDA shall review and update this memorandum on an annual basis.

13. This memorandum constitutes the entire understanding between the parties. No amendment or modification changing its scope or terms shall have any force or effect unless in writing and signed by both parties. It shall be construed in accordance with the law of the Commonwealth of Pennsylvania.

14. The County shall comply with the Non-Discrimination Clause, the conditions of which are set forth in Exhibit A, attached hereto and made a part hereof. In said exhibit, the County is referred to as "contractor."

15. Pursuant to federal regulations promulgated under the authority of The Americans With Disabilities Act, 28 C.F.R. Section 35.101 et seq., the County understands and agrees that no individual with a disability shall, on the basis of the disability, be excluded from participation in this contract or from activities provided for under this contract. As a condition of accepting and executing this contract, the County agrees to comply with the "General Prohibitions Against Discrimination," 28 C.F.R. Section 35.130, and all other regulations promulgated under Title II of The Americans With Disabilities Act which are applicable to the benefits,

services, programs, and activities provided by the Commonwealth of Pennsylvania through contracts with outside contractors.

16. The County shall be responsible for and agree to indemnify and hold harmless the Commonwealth of Pennsylvania from all losses, damages, expenses, claims, demands, suits, and actions brought by any party against the Commonwealth of Pennsylvania as a result of the County’s failure to comply with the provision of paragraph 15 above.

In Witness of this Understanding and with the intention of being legally bound by this document, the Parties have caused this memorandum to be executed by their duly authorized representatives as of the latest date of signature below.

COMMONWEALTH OF PENNSYLVANIA

DEPARTMENT OF AGRICULTURE

February 24, 2010

Dear County Sealers:

This letter is written to update you on the Department of Agriculture's efforts to implement the Certified Examiner of Weights and Measures Program (CEWM). After continued review with the Department's legal office, it has been determined that the Act 155 of 1996 allows the Department greater flexibility in defining the parameters of the planned CEWM program than initially thought.

As a result, CEWM's will only be authorized to inspect and certify devices under the direct responsibility of the Department. Where a Memorandum of Understanding exists between the Commonwealth and a County identifying the devices which the County Weights and Measures program will be responsible for inspecting and certifying, CEWM's will not be authorized to conduct inspections of those devices located or stationed in those counties.

The Department of Agriculture strongly believes that the service the county programs provide to their constituents is the foundation to a comprehensive Weights and Measures program and supports the local programs in their efforts. Likewise, I believe that the CEWM program, with appropriate oversight by the Commonwealth, is able to continue to assure consumer confidence and equity in transactions and will be a viable component of the Commonwealth's Weights and Measures program.

If you have any questions, please call John Dillabaugh, Director, Bureau of Ride and Measurement Standards at 717.787.9089.

Sincerely,

A handwritten signature in black ink, appearing to read "Doug Kilgore".

Doug Kilgore  
Deputy Secretary for Agriculture and Consumer Protection

cc: County Commissioners – Counties of Adams, Allegheny, Beaver, Blair, Bucks, Centre, Cumberland, Delaware, Elk, Greene, Huntingdon, Lancaster, Montour, Northampton, Northumberland, Sullivan, Westmoreland, York

The Honorable Chris Doherty, Mayor, City of Scranton

The Honorable John Christopher Soff, Mayor, City of Meadville

The Honorable Russell C. Redding, Secretary, Department of Agriculture
